

ADR

Martindale's ADR Checker

The authoritative source in managing adverse drug reactions

AUTHORITATIVE • COMPREHENSIVE • TRUSTED • TAILORED

Martindale's ADR Checker provides comprehensive yet concise, clinically-useful information on adverse drug reactions to support healthcare professionals when managing patients with such reactions. Answers to adverse reaction queries can be found quickly and easily, and the format tailored to individual needs.

KEY FEATURES

Comprehensive and powerful search functionality allows you to quickly search and compare drugs, with filters and sorting options alongside a severity flag system.

Snapshot management categories enable quick decision making at point of care.

Standardised controlled vocabulary of adverse drug reactions.

Easily click through from the management advice to brand new ADR profiles in Martindale for more in-depth research, all evidence graded and fully referenced to give you the utmost confidence.

Red flags for severe ADRs help you quickly identify what could harm your patient.
